

*Are you experiencing:*

- ☑ **TECHNOLOGY COST OVERRUNS?**
- ☑ **IN-HOUSE SOLUTION CONSUMING TIME AND RESOURCES?**
- ☑ **INTEGRATION AND MAINTENANCE PROBLEMS?**

*There is a better way!*

### **Get an Edge with GIMS**

Tritech's General Insurance Management System – GIMS – is available as in-house implementation or outsourced at one of our world class co-location data centers. GIMS is capable of handling the needs of insurance companies of all sizes. The GIMS enterprise solution is consistently rated high in function and technology, while increasing efficiency and productivity.

### **GIMS Features**

- Comprehensive policy management functions, from agency automation and underwriting to billing and claims to reinsurance and management reporting.
- Modular, enterprise solution based on relational database (Oracle, SQL Server)
- Easily accessed 24x7 from Web Browser or Windows GUI interfaces.
- SOA real-time interface to brokers/agents and third-party services using single sign-on Web Services model.
- Supports all lines of business across North America (clients in USA, Canada and Puerto Rico).
- Fully serviced solution running on high availability modern servers and state of the art co-location data centres.
- Access, control and speed to implement requirements by business analysts, not programmers

### ***Our clients have:***

- (1) Slashed operational IT spending by at least 50%**
- (2) Reduced technology cost to 1% of GWP.**

**Our Clients got an edge with GIMS, shouldn't YOU?**
