

OUTSOURCING Solutions from Tritech Financial Systems Inc.

Benefits of Outsourcing with Tritech

Tritech remains dedicated to the Insurance Community for over 20 years. During this time, we have served various clients in North America, with annual GWP ranging from 5 million to 1.5 billion. We possess strong in-house expertise in all aspects of delivering and maintaining fully featured and cost-effective solutions for Insurance Companies.

Our goal is not to serve many, but serve well. We offer first-class technical support with efficient issue escalation that provides direct immediate access to business analysts and developers who designed and architected the system.

Virtual P&C Insurance Solution Centre

Tritech's "Virtual P&C Insurance Solution Centre" provides a complete P&C solution that operates over TCP/IP Conections.

Insurance companies will use the new Solutions Centre for:

**Policy Underwriting
Claims Management
Document Issuance
Bureau filing
Web Services (Agents portals)**

**Billing
Reinsurance
Management Reporting
Financial Reporting (GL &AP)**

Policy types supported:

**Commercial Auto
Personal Property
Farm**

**Personal Auto & Non Standard Auto
Commercial Property & Liability
Workers Compensation**

The Virtual P&C Insurance Solution is a Network Centric solution requiring a standard Windows desktop and a TCP/IP connection, only Windows is required on the desktop, requiring no 3rd party software. This platform provides a fast, secure and reliable environment to support company's staff, adjusters and agents from any location.

Your firm's own Business Analysts are able to set up and maintain your Products, Rates, Forms and User profiles from your offices.

Reports and Documents are on line, available 24x7 from any Web Browser. Documents can be printed to any connected printer or Emailed as PDF attachments.

The Financial Reporting Module is posted daily with all activity from the policy, billing, claim and reinsurance processing.

The Customer Inquiry Module provides fast access to all Policy, Billing, Claims and Reinsurance information for the company's staff, adjusters and Agents.

The Virtual P&C Insurance Solution Centre will be particularly attractive to P&C companies who wish to bring new solutions or lines of business to market earlier or reducing I.T. costs.

Virtual P&C Insurance Solution Centre

Tritech's "Virtual P&C Insurance Solution" provides a complete Internet-based P&C solution. This outsourced solution is flexible and easily managed by your business analysts. Tritech's General Insurance Management System (GIMS) is an Enterprise End-to-End solution that fully automates your workflow and supports all lines of business & transaction types, in Canada and the United States.

The Outsourcing Solution is based on Annual Gross Written Premiums processed through the facility. Our clients have reduced their annual IT costs by up to 50% and more. The only additional costs are for your personal computers and connections to the data center. Secure access is provided to any User from anywhere.

The Outsourcing solution runs at a five 9's World Class Co-location data center with a Hot Site backup at Tritech's Data Center. This provides a superior level of service, with fully equipped facilities to keep our clients running in all situations.

We back up our Outsourcing services with a 99.5% up time guarantee. To see an overview of one of the World class data centers, that Tritech uses, follow this link:
