

## **Enterprise End-to-End P&C Insurance Solution**

---

Tritech's General Insurance Management System (GIMS) is a cost-efficient enterprise end-to-end solution that provides smooth operations for mid-sized P&C insurance companies. GIMS comes with all lines of business and support of multiple states out-of-the-box.

Cost efficiency and improved time-to-market are results of easier business rules maintenance through the centralized repository, where business analysts define and manage the following aspects of the GIMS system using System Support Centre (SSC):

- User permits, roles and profiles
- Policy types, limits, deductibles
- Rating algorithm & rates
- Billing methods
- Automated diaries and notifications
- Accounting
- Reinsurance cessions
- Business processes
- Forms

GIMS Enterprise Insurance Solution will be particularly attractive to P&C companies who wish to bring new products or lines of business to the market in a timely manner, and to those looking to reduce operational costs and management time.

### **Key GIMS Features**

- Issuance of quotes and applications
- Policy underwriting
- Billing (incl. plan switching)
- Claims management (incl. fraud protection)
- Reinsurance management
- GL/AP
- Document issuance (incl. checks and letters)
- Workflow
- Legal archive
- Management reporting
- Financial reporting
- Bureau filing (NAIC, ISO)
- Rate filing

Reports and Documents are online, available 24x7 from any Web Browser. Documents can be printed to any printer or E-mailed as PDF attachments.

The Financial Reporting Module is updated daily with all activity from the policy, billing, claim and reinsurance processing.

The Customer Inquiry Module provides web-based access to all Policy, Billing, Claims and Reinsurance information for the company's CSRs and Agents.

### **Policy Types Supported**

- Commercial Auto
- CPP & BOP
- Workers Compensation
- Personal Auto
- Non-Standard Auto
- Personal Property & Liability
- Farm & Country Estate

### **Technology**

The GIMS P&C Insurance Solution is network-centric. All components reside on the server and utilize latest technologies such as XML, SOAP, ASP.NET, Win32 and Terminal Services. Workstation requires a standard Windows desktop and a TCP/IP connection. This provides fast, secure and reliable environment for company's staff, adjusters and agents, even for those working remotely over the Internet.

### **About Tritech**

Tritech has clients in the USA, Puerto Rico and Canada. Tritech's clients have included small and large stock and mutual companies.
